Maybe the idea of going to a resort where you can be naked and hook up with other couples sounds like your worst nightmare. Or maybe you already are in a nonmonogamous relationship, or are otherwise "in the lifestyle," and it sounds amazing. Maybe you're somewhere in between and just looking for a truly memorable place that's likely to spark your sex life. Either way, these are my picks for some of the sexiest and most adventurous vacation destinations around the world.

Not all of the locations on this list are for nudists or nonmonogamous people – some are just sexy hotels. That said, I've been to several of the clothing-optional lifestyle resorts on this list, and I can't recommend the experience enough. Though I'm not exactly a full-time nudist or swinger, each time I stay at a particularly open-minded place, I end up feeling closer to my partner, more free, and better in my body than ever before.

Consent is emphasized at most lifestyle and nudist resorts, and no one should pressure you to participate in any way. It's worth noting that plenty of people just like to go and watch other people hook up or to explore their exhibitionist and nudist side together, monogamously. The point is, every couple has their own agreement, and the people who frequent these places respect that. No pictures are allowed on the premises of nudist resorts, which means your privacy is protected. **Also of note for LGBTQ+ couples:** many/most couples who attend lifestyle resorts seem to be straight, though all are welcome. Many women are fluid and interested in women, but many resorts mentioned here offer special LGBTQ+-themed weeks, so you'll want to check those out for the most options.

Take a chance with one of these vacations, and you might just end up with one you'll definitely never forget!

2 Hedonism II

Hedonism II is another nudist lifestyle resort that will always have my heart. Located in Negril, Jamaica, Hedonism is a lot like a naughty Summer camp. Less upscale than Riviera Maya (but still nice and clean) and not limited to couples, Hedonism is a place where anything goes – given there's respect and consent. The ganja is as easy to come by as the acceptance of all kinds of bodies and age ranges, and the vibe varies widely based on the themed groups that attend nearly every week.

If you want to dive headfirst into sexual adventure, check out Young Swingers Week with your boo (plenty of nonswingers go as well). If you'd like to explore being with a woman without leaving your male partner behind, a group called The Playful Pussycats offers just that kind of facilitated fun. If you don't go during a theme week, expect a mix of both nudists and swingers, potentially skewing slightly older, though not always.
